EPC 18 PRO

ENGINEERED FOR RE-CUTTING OF LEATHER AND FABRICS

Cutting system with a working area moving on rollers for continuous automatic cutting of leather and materials in rolls (synthetic and fabrics).

EPC 18 PRO is ideal for prototyping and production with manual and automatic nesting on leather and fabrics.

VACUUM SYSTEM THE POWER IS IN THE AIR

The vacuum surfaces consist of **54 independent and dynamic small sectors** of 200x200 mm. They are dynamic because are driven by a software that recognizes the shape of the material and the position of the cutting head. The system automatically activates, with different power, only those areas interested by the cutting operations, excluding completely those not occupied.

With this patent TESEO concentrates the suction only where it is really needed, for the highest accuracy and speed.

FAST AND ACCURATE CUTTING ON ALL MATERIALS

- Exclusive pneumatic knife groups interchangeable in a few seconds, with high oscillation frequency (up to **36.000 RPM**).
- Low consumption of compressed air of only 90 l/min (other systems have 250 l/min).
- Available with **1, 3, 5 and 7 mm oscillation stroke** for the best result on any thickness.

UP TO 50%
ENERGY SAVING

LESS NOISE MORE COMFORT

The internal light system allows the Arghon camera to better control the material, avoiding light pollution due to external factors.

Automatic opening and closing of the protection cover

EPC 18 PRO is equipped with a **special cover protection that reduce the dB emission** of the machines. It guarantee a friendly and healthy working environment for the operators and it can be installed in any environment.

HIGH ACCURACY DOUBLE CHECK

ARGHON

ARGHON is a **dual optical sensor camera with powerful micro computer**. It processes 100 scans per second with **0,02 mm** resolution.

Thanks to the **3D** vision, ARGHON is constantly capable of measuring the wear of the cutting carpet and the hide thickness, detecting variations in height.

ARGHON recognizes the effective execution of cut and punches for an **automatic quality control**.

EPC 18 PRO is equipped with two high resolution cameras for shape recognition and automatic nesting.

Sherlock is a precision optical recognition system developed by TESEO. Installed directly on the cutting heads, it is able to **recognize any kind of pattern** of the material that needs to be cut: logos, textures, designs or lines.

**HIGH
PRODUCTION**

RE-CUTTING

Automatic alignment with Arghon camera of the trimming of the pieces through reference points (notches, points, seams, logos and perimeter edge).

The operator will only have to **place one or more parts in the front area** of the EPC PRO, the integrated camera system (the external ones + Arghon) will automatically do the rest for an easy, immediate, and accurate re-cutting.

High production with absolute accuracy. Inspection on each piece with alignment and rotation in real time.

Fast re-cutting and in continuous (on conveyor) for a high productivity of the system.

Sherlock will automatically adapt in real-time the theoretical nesting to the actual pattern of the material, pieces by pieces.

OTHER USES

LEATHER

MULTI LAYER

UP TO
25
mm

EPC 18 PRO is equipped with devices for automatic and steady moving of multi-layer materials.

HARD MATERIALS

TEXON
5 MM THICKNESS

CARDBOARD
3 MM THICKNESS

LEATHER INSOLE
4 MM THICKNESS

EPC 18 PRO

technical sheet

Automatic soundproof door.

1 arm equipped with compact multi-tools head.

HEADS:

G5Xce cutting heads with 6 tools:

- 1 Blade for fast cutting
- 1 Pen
- 1 Punch
- 3 Different diameter dies: from 0.8 to 12 mm

ZAG system: SERVO control (Z-axis).

Precision $\pm 0.005\text{mm}$. It increases the execution time of all the tools, it improves the cutting quality and it allows the cutting of material up to 18 mm height.

Working area sectorized with 54 sections of 200x200 mm each singularly activated by dynamically controlled valves (DVC, patent) for the optimal hold of the hide on the perforating surface.

MODEL	EPC 18 PRO
HEADS	1
CUTTING AREA	1800 x 600/1000 mm
SCANNING AREA	1800 x 600 mm
HIGH RESOLUTION CAMERAS	2
PROJECTORS	1
DIMENSIONS	2660 x 2230 x 2670 mm
WEIGHT	1800 kg

ISO 9001:2015

Certifies the Quality of the company in each of its process, in order to increase the efficacy and efficiency, to ensure a Quality product and obtain the highest level of Customer satisfaction.

ISO 14001:2015

Obtaining Environmental certification means the commitment to limit environmental impact and reduce emissions, encouraging recycling and all the good environmental practices for a sustainable development.

ISO 45001:2018

A company certified according to this international standard adopts an organizational model that ensure Safety and Health at work, allowing employees to operate in the best conditions.
