SIGMA 300

HIGH PERFORMANCE SYSTEM FOR LEATHER CUTTING AND FABRICS

SIGMA 300 has a working area moved by conveyors, for continuous automatic cutting of leather and materials in rolls (synthetic and fabrics).

3 INDEPENDENT MULTI-TOOL HEADS ARE BETTER THAN 2

The secret is not just adding cutting heads but being able to let them work synergistically. In 2006 TESEO introduced the first machine with **3** cutting heads which handles the individual units in a continuous manner without interference even in the same area of the leather, thanks to an innovative software, increasing the productivity of **60%** (compared to the same machine equipped with only **2** cutting heads).

The third head marked the turning point: in this decade, it has evolved and improved thanks to the experience gained with over **4.000** systems installed within the largest companies in the world, in various sectors such as footwear, leather goods, automotive and furniture.

SAVING OFF-BOARD AND ON-BOARD NESTING

OFF-BOARD INSPECTION AND NESTING PROCESS

OFF-BOARD NESTING ON MOB

Leather inspection and classification table, provided with Meti software, useful for manual or automatic scanning and nesting. 3000x1200 mm sectorized and vacuum surface.

1. ROT POSITIONING
2. SCANNING
3. NESTING

The leather is scanned and marked with defects and quality areas. Once the leather is ready, the software performs the automatic nesting.

4. ON-BOARD REPOSITIONING

The leather now can be automatically re-positioned and cut in any Teseo's cutting machine.

ON-BOARD AUTOMATIC NESTING ON SIGMA 300

Teseo's algorithms will automatically place pieces to be cut on the available material, optimizing the yield.

MOB 300K

ON-BOARD MANUAL NESTING ON SIGMA 300

The operator can also manually place parts in the front area of the **SIGMA 300**.

VERSATILITY

LEATHER

THE SIGMA 300 CAN PROCESS HIDES OF DIFFERENT SIZES, WITH A CONSTANT OPTIMIZATION OF THE 3 CUTTING HEADS.

FABRIC AND SYNTHETIC

The working surface with moving belt on conveyor makes it ideal for the cutting of materials in rolls. The material moves on automatically and continuously; the automatic nesting maximizes the material consumption. The width of the work surface (3000 mm) allows to simultaneously cut even **2 parallel rolls** for an even higher production.

UP TO 8 LAYERS

Maximum precision and cutting efficiency for materials from **1 up to 8 layers**, thickness up to **12 mm**.

HIGH ACCURACY FOR YOUR LOGOS

Sherlock is a precision optical recognition system developed by TESEO. Installed directly on the cutting heads, it is able to **recognize any kind of pattern** of the material that needs to be cut: logos, textures, designs or lines.

Automatic alignment through reference points (notches, points, seams, logos and perimeter edge).

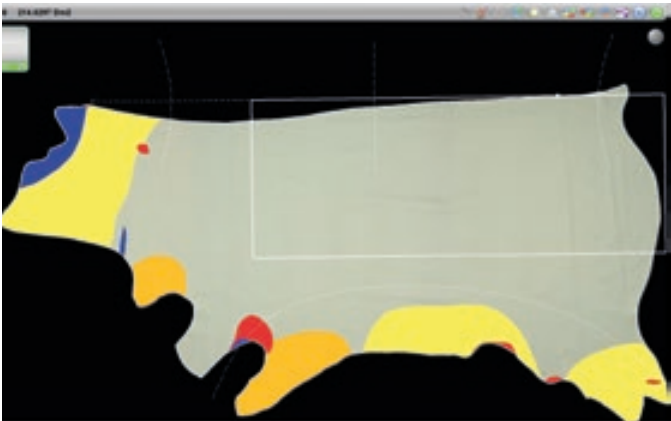

0,05
mm
PRECISION

Sherlock will automatically adapt in real-time the theoretical nesting to the actual pattern of the material, pieces by pieces.

SCANNING AND QUALITY CONTROL

MHS SOFTWARE ALLOWS TO CAPTURE THE IMAGE OF THE HIDE AND ITS DEFECTS, THANKS TO THE HIGH RESOLUTION CAMERAS.

6
PROJECTORS
HD

5
HIGH RESOLUTION
CAMERAS

The scan takes only **3 seconds**, it covers the whole working area and it is steady to ensure a perfect quality of the picture, highlighting even the smallest detail of the leather texture (resolution 0.25 mm).

The mark of the quality areas, the direction lines of the leather and every reference traces are shown instantly on the hide, exactly where it will be cut.
This ensures the highest accuracy of nesting and the absolute control in each stage.

WIRELESS OPTICAL PEN

The exclusive **WOP system** allows to mark virtually the defects and the different quality areas, without leaving any trace on the leather.

VACUUM SYSTEM THE POWER IS IN THE AIR

The vacuum surfaces consist of **independent and dynamic small sectors (200)** of 150x150 mm. They are led by a software that recognizes the shape of the material and the position of the cutting head. The system automatically activates, with different power, only those areas interested by the cutting operations.

With this **patent TESEO** focuses the suction only where it is really needed, for the highest accuracy and speed.

INTELLIGENT
The vacuum system activates **only the necessary sectors and requires** a low consumption vacuum pump (less than 15 Kw), saving up to **40%** of energy compared to all the other solutions.

ONLY IN TESEO CONVEYOR SYSTEMS THE VACUUM ALWAYS FOLLOWS THE CUTTING HEAD

- **NO PAPER OR FILM NEEDED**
- **ZERO BUFFER**
- **LEATHER SAVING**

The vacuum, concentrated only in the cutting zone, allows the maximum of the performance **without having to use plastic or paper film** to keep the pieces blocked. The ability to cut up to the edges and to Ø mm between one piece and another, allows a further **considerable saving of material**.

ASSISTED COLLECTING OF THE CUT PARTS

SIGMA 300 is equipped with an high brightness color projection system, which directly projects on the hide to make the activity of collecting of cut parts faster and easier.

- size 34
- size 37
- size 39
- size 39
- size 42

COLLECTING

the cut parts is easier and faster when you can separate different **items** or different **sizes** by their colour, you also avoid mistakes while assembling the product.

ULTRA COMPACT CUTTING HEADS

We concentrated the reknown reliability and performances in just **7.5** cm.

The willingness to adopt the fourth cutting head has stimulated the search for solutions designed to save space, so that the different heads could better interact. The result is an exceptional head, with **5** tools, that occupies less space (**-40%**).

But not only: the small size and the increased mechanical stiffness, allow this technological jewel a greater dynamism and an improved reliability.

115 mm

270 mm

115 mm

The compactness of TESEO arms and heads makes SIGMA 300 extremely efficient, even on 2400 mm hides

ARGHON is a **dual optical sensor camera with powerful micro computer**. It processes 100 scans per second with 0,02 mm resolution.

ARGHON

Thanks to the **3D** vision, ARGHON is constantly capable of measuring the wear of the cutting carpet and the hide thickness, detecting variations in height.

ARGHON recognizes the effective execution of cut and punches for an **automatic quality control**.

ARGHON recognizes details size less than **0.1 mm**. It enables a better recognition of **ROT** (Reference Optical Tag) for automatic hide re-positioning.

SINCE
1993
TESEO
INVENTED
THE FIRST
OSCILLATING

FOR LEATHER

UP TO
6
TOOLS

ALWAYS AVAILABLE IN REAL TIME

The cutting head tool-stand are independent and **always available** (installed in parallel under the cutting head). The choice of the punches to use involves only its activation via software **without waiting**. The tools can be deactivated individually in case of a fault, **without harmful machine downtimes**.

FAULT
TOLERANCE

FAST, LIGHTWEIGHT AND QUIET

The TESEO cutting heads are equipped with **single spindles (TESEO patent)** dedicated to punches and punchings. Manufactured with extremely fixed and light materials (only **148 gr**), they are easy to handle as well as reliable. The reduced weight allows a **faster punching and a lower energy consumption**.

PUNCHING WITH SUCTION

Active suction in every cutting head: the shavings are canalized in the specific tank to **keep clean the cutting area every time, also from very thick materials**.

FAST AND ACCURATE CUTTING ON ALL MATERIALS

- Exclusive pneumatic oscillating knife with high oscillation frequency (up to **50.000 RPM**).
- Low consumption of compressed air of only **95 l/min** (other systems have 270 l/min).

- Time saving

Changing blade or oscillating knife in less than **45 seconds**.

- Available with **1, 3, 5 and 11 mm oscillation stroke** for the best result on any thickness.

LESS NOISE MORE COMFORT

Automatic soundproof door for optimal work comfort (77.8 dB)

SAFE

SIGMA 300 is equipped with a **special cover protection that reduces the dB emission** of the machines. It guarantees a friendly and healthy working environment for the operators.

Rear cover protection to ensure maximum comfort for the operator.

SIGMA 300 MEETS THE **INDUSTRY 4.0** REQUIREMENTS

Every company that operates today faces a common challenge:
the need for connectedness and access to real-time insights across processes, partners, products, and people.

Industry 4.0 represents a unique opportunity for an efficient and agile reorganization of production activities focusing on interconnectivity, automation, machine learning and real-time data.

It's about revolutionizing the way your entire business operates and grows. It's about choosing the best technology to **Upgrade your business.**

That's where TESEO comes into play.

SIGMA 300 meets the Industry 4.0 requirements for a SMART factory

SMART PRODUCTION:

SIGMA 300 is designed for integration with ERP, planning, design and product development systems. Process data collection, real-time reporting and statistical analysis.

SMART SERVICE:

Remote interaction via NESSO® software to collect operational data and to provide remote support and maintenance through augmented reality technologies (i.e. NESSO®Visual).

SMART ENERGY:

Energy consumption 40% lower than other solutions on the market.
High performance as well as security and improved energy saving.

SIGMA 300 TECHNICAL FEATURES

Movement on grinded precision guides and grinded re-circulating balls lead screws (ISO 3, max. error ±0.005mm).
Brushless motors with digital closed-loop position control.

METI software procedures for a parallel management of real-time perforation, loading and optimization of perforation files from SQL/MDX archives, work time statistics, cutting order management.

Working area sectorized singularly activated by dynamically controlled valves (DVC, patent) for the optimal hold of the leather on the area.

MODEL	SIGMA 300
HEADS	3
CUTTING AREA	3000 x 1400 mm
SCANNING AREA	3000 x 1100 mm
HIGH RESOLUTION CAMERAS	5
PROJECTORS	2+2+2
DIMENSIONS	4160 x 3550 x 2140 mm
WEIGHT	3500 Kg

ISO 9001:2015

Certifies the Quality of the company in each of its process, in order to increase the efficacy and efficiency, to ensure a Quality product and obtain the highest level of Customer satisfaction.

ISO 14001:2015

Obtaining Environmental certification means the commitment to limit environmental impact and reduce emissions, encouraging recycling and all the good environmental practices for a sustainable development.

ISO 45001:2018

A company certified according to this international standard adopts an organizational model that ensure Safety and Health at work, allowing employees to operate in the best conditions.
