

ROLL HOLDER
NO NEED OF SPREADER

**NON
STOP
CUTTING**

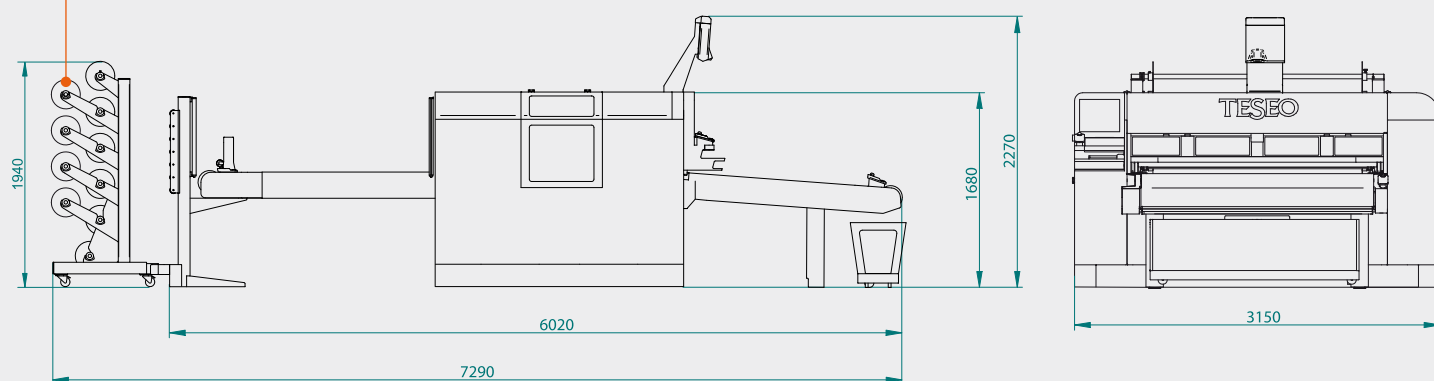

Thanks to the double clamp
(1 travelling clamp + 1 fixed clamp)
it is possible to change work order
or material during the cutting without
stop the equipment.

MLF

The traveling clamp keeps the
material plies together and drives
them into the cutting area.

The fixed clamp keeps the material
stable in the cutting area.

TESEO cutting head is the most compact, efficient and complete tool for the cutting of leather ever realized.

TYCHE is equipped **four independent cutting heads** able to work simultaneously: it cuts up to **144 meters per minute** per layer.

4,6,8, or 10 layers of material cut with extreme accuracy.

TYCHE can be equipped with a **frontal projection** to facilitates the picking up of the pieces, which are distinguished by color for each size and different articles.

METI is the most powerful software for automatic placement using quality areas for leathers.

The software is extremely powerful: it performs both automatic or manual placements using customized strategies. In order to get the maximum production and quality, it optimizes the cutting path.
